ABOUT ME

A Full-Stack Web Developer skilled in React, Next.js, Node.js, MongoDB, and TypeScript, focused on creating scalable, user-centric applications. Seeking an opportunity to leverage my front-end development skills and passion for AI-driven technologies in cutting-edge Generative AI projects to create impactful, innovative solutions.

EXPERIENCE

Independent Full-Stack Developer (Freelance Contract)

Sep 2024 - Present

Designed & developed several impactful projects aimed at enhancing online experiences, client engagement, and content discovery:

- Developed [Rose-RealEstate](#), a real estate platform, elevating property browsing with an intuitive user interface.
- Built [SixthDimensionStudio](#), improving client engagement through an interactive and modern design.
- Created [EliteEntrepreneursPodcast](#), improving content discovery through a user-friendly podcast platform.

PROJECTS

NoteWiz (AI-driven Educational Platform) — [GitHub](#)

Mar 2024 – Aug 2024

Developed an AI-driven educational platform designed to promote gamified learning experiences through personalized engagement:

- Designed a secure **authentication system** with JWT to enable personalized and secure user interactions.
- Built a mechanism for auto-generating **AI-powered flashcards and quizzes** from varied input formats, fostering interactive learning with instant feedback. Developed an engaging **chatbot** for document queries and enhanced learning interactivity, while storing user progress and history with **MongoDB & Prisma**.

Full-Stack E-Commerce Platform — [GitHub](#)

Sep 2024 – Oct 2024

Developed a comprehensive, feature-rich e-commerce platform designed for an optimal shopping experience:

- Developed a user-friendly platform with **distinct user and admin modes**, supporting features like seamless product browsing, cart functionality, and real-time order tracking for enhanced user experience.
- Designed a robust **admin dashboard** enabling efficient **CRUD operations** to manage products, categories, and orders, and integrated the payment gateway for secure and streamlined checkout processes.

Admin Dashboard (Enterprise Solution) — [GitHub](#)

Oct 2024 – Nov 2024

Built a comprehensive admin dashboard for efficient management:

- Integrated **Material UI Data Grid** for data tables and invoice management.
- Developed **dynamic pages** for user profile, calendar with drag-and-drop functionality, and FAQ management. Incorporated **Nivo charts** for **data visualization** in bar, pie, line, and geographical formats.

YouTube Clone (Responsive Web App) — [GitHub](#)

Oct 2023 – Dec 2023

Created a responsive YouTube clone mimicking core YouTube features:

- Integrated **YouTube API** for dynamic video fetching, recommendations, and search functionality and implemented custom **video player interface** with standard YouTube controls.

Peekabyte (Hackathon Project) — [GitHub](#)

Dec 2023

Collaborated on an innovative project leveraging **steganography** for data concealment, securing **2nd place** in the competition:

- Developed a secure data encoding/decoding tool using **LSB** for embedding hidden messages within images. Built the back-end in **Node.js and Express**, creating APIs for encoding and decoding functionalities.

SKILLS

Languages: JavaScript, C, C++, Java

Web Development: React, Next.js, Node.js, HTML, CSS, Tailwind CSS, Figma

Databases: MongoDB, Prisma, SQL

Soft Skills: Rapid Learner, Articulate Communication, Collaborative Spirit, Efficient Time Management, Innovative Thinking & Strategic Analysis, Attention to Detail

EDUCATION

Bachelor of Engineering in Information Technology - GPA: 3.4/4

MJCET/Osmania University, Hyderabad (2020-24)
